DEPARTMENT OF COMPUTER APPLICATION (BCA)
BCAC501 – PHP WITH MYSQL | SEMESTER V

PROJECT DETAILS REPORT

1. Project Title

Student Feedback System

2. Problem Statement

Institutions rarely have an organised way to collect structured feedback from students about the courses and faculty teaching them each semester. Feedback is often gathered informally or not at all, so departments have no reliable record of which courses are working well, which faculty need support, or where students are unhappy, and no accountability trail once feedback is given. This system lets students submit rated feedback with comments against the specific courses and faculty they are enrolled with for the current semester, while the Admin manages the course/faculty catalogue, reviews all incoming feedback, flags or resolves concerns, and pulls reports and analytics to guide academic decisions.

3. User Roles

The system has two roles:

- **Student** — Registers/logs in, browses the course catalogue for their semester, submits feedback (rating + comments) for a course/faculty, views the status and history of their own submitted feedback, downloads a copy of their submission, and edits their own profile/contact details.
- **Teacher** — Registers/logs in, views the courses/faculty assignments associated with their account, views feedback and ratings submitted by students for their courses, reviews comments and feedback history, downloads feedback reports, and edits their own profile/contact details.
- **Admin** — Logs in separately, manages the course/faculty catalogue (add/edit/remove courses, assign faculty, set semester/department), views ALL feedback from every student, marks feedback as Reviewed or Resolved, flags low-rated courses/faculty for attention, exports feedback data, and sees rating analytics at a glance.

4. Module List — Mapped to This Project

Every mandatory module, mapped specifically to this project's subject matter:

1. Authentication
Student Register & Login, and a separate Admin Login. Passwords stored using password_hash().

2. Role-Based Access
Three roles: Student, Teacher, and Admin, each with their own dashboard and different permissions after login.

3. Dashboard
The student dashboard shows the student's submitted feedback history and provides a quick "Browse Courses" shortcut for available courses. The teacher dashboard shows assigned courses, feedback summaries, average ratings, and access to feedback received for their assigned courses. The admin dashboard shows overall feedback statistics, including total feedback count, overall average rating, flagged/low-rated courses or faculty, and feedback status counts such as Submitted, Reviewed, and Resolved.

4. Core Entity CRUD
The core entity is Course. Admin can Add / View / Edit / Delete course records (course name, course code, department, semester, assigned faculty name).

5. Listing Page
Course Catalogue page — all courses in a table/grid with Search (by course name/code) and Filter (by department/semester).

6. Detail View
Clicking a course opens a detail page showing the course info, assigned faculty, average rating, and the full list of feedback comments submitted for it.

7. Status Workflow
Each feedback entry moves through 3 states: Submitted -> Reviewed -> Resolved. Only Admin can change status (e.g., after acting on a complaint raised in the comments).

8. Admin Panel
A separate Admin area listing ALL feedback (not just one student's), with buttons to mark Reviewed/Resolved, a Flagged/Low-Rated view, and course/faculty management.

9. Form Validation
The feedback form validates that a rating (1-5) is selected, that the comment field is not empty, and that a student cannot submit duplicate feedback for the same course in the same semester, checked in PHP, not just HTML.

10. Flash Messages
Every action shows a message: feedback submitted, feedback marked reviewed/resolved, course added/updated, login failure, etc.

11. Profile Management
Students can view/edit their own name and contact number, needed so Admin can follow up if required.

Optional modules included, since they genuinely apply to this project:

- **Rating/Survey Flow** — selecting a course and submitting a star rating plus comments is the core transaction of this system.
- **Basic Reports/Counts** — Admin dashboard shows total feedback count, average rating, and count of flagged/low-rated courses.
- **File Handling** — three concrete features: (1) Student downloads a text/PDF copy of their submitted feedback, generated server-side and served as a file download; (2) Admin exports the full feedback list (or course list) to a CSV/Excel file for record-keeping; (3) Admin bulk-uploads new courses by uploading a CSV file, which PHP reads row-by-row and inserts into the courses table instead of adding items one at a time.

5. Database Tables (Draft)

The following is the current draft structure. Exact column types/sizes may be refined once development begins.

Table: users

- user_id INT AUTO_INCREMENT PRIMARY KEY,
- name VARCHAR(100) NOT NULL,
- email VARCHAR(100) UNIQUE NOT NULL,
- phone VARCHAR(15) NULL,
- password VARCHAR(255) NOT NULL,
- role ENUM('student', 'teacher', 'admin') NOT NULL,
- student_number VARCHAR(30) UNIQUE NULL,
- employee_id VARCHAR(30) UNIQUE NULL,
- department VARCHAR(100) NULL,
- semester VARCHAR(20) NULL,
- section VARCHAR(20) NULL,
- created_at DATETIME DEFAULT CURRENT_TIMESTAMP

Table: courses

- course_id INT AUTO_INCREMENT PRIMARY KEY,
- course_code VARCHAR(20) NOT NULL,
- course_name VARCHAR(100) NOT NULL,
- department VARCHAR(100) NOT NULL,
- semester VARCHAR(20) NOT NULL,
- section VARCHAR(20) NULL

Table: course_assignments

- assignment_id INT AUTO_INCREMENT PRIMARY KEY,
- course_id INT NOT NULL,
- teacher_id INT NOT NULL,
- FOREIGN KEY (course_id) REFERENCES courses(course_id) ON DELETE CASCADE,
- FOREIGN KEY (teacher_id) REFERENCES users(user_id) ON DELETE CASCADE,
- UNIQUE (course_id, teacher_id)

Table: questions

- question_id INT AUTO_INCREMENT PRIMARY KEY,
- question VARCHAR(255) NOT NULL

Table: feedback

- feedback_id INT AUTO_INCREMENT PRIMARY KEY,
- student_id INT NOT NULL,
- assignment_id INT NOT NULL,
- status ENUM('submitted', 'reviewed', 'resolved') DEFAULT 'submitted',
- submitted_at DATETIME DEFAULT CURRENT_TIMESTAMP,
- FOREIGN KEY (student_id) REFERENCES users(user_id) ON DELETE CASCADE,
- FOREIGN KEY (assignment_id) REFERENCES course_assignments(assignment_id) ON DELETE CASCADE,
- UNIQUE (student_id, assignment_id)

Table: feedback_answers

- answer_id INT AUTO_INCREMENT PRIMARY KEY,
- feedback_id INT NOT NULL,
- question_id INT NOT NULL,
- rating TINYINT NULL CHECK (rating BETWEEN 1 AND 5),
- answer_text TEXT NULL,
- FOREIGN KEY (feedback_id) REFERENCES feedback(feedback_id) ON DELETE CASCADE,
- FOREIGN KEY (question_id) REFERENCES questions(question_id) ON DELETE CASCADE,
- UNIQUE (feedback_id, question_id)

6. Page List

Public Pages

- Register — New student/ Teacher account creation
- Login (Student) — Student authentication
- Login (Teacher) — Teacher authentication
- Login (Admin) — Separate Admin authentication

Student Pages

- Student Dashboard — Landing page — summary of own feedback, quick links

- Course Catalog (Listing) — Browse/search/filter all available courses
- Course Detail — View a single course's details, submit feedback for it
- My Feedback (Listing) — List of the student's own submitted feedback with current status
- Feedback Detail View — Full history of a single feedback entry
- Profile — View/edit own name, contact info, change password

Teacher Pages

- Teacher Dashboard — Landing page showing assigned courses, feedback summaries, average ratings, and quick links
- My Courses / Assignments (Listing) — View courses and sections assigned to the teacher for each semester
- Course Feedback (Listing) — View student feedback and ratings for the teacher's assigned courses
- Feedback Detail View — View the complete feedback entry, including ratings, comments, submission date, and current status
- Feedback Reports — View/download feedback summaries and reports for assigned courses
- Profile — View/edit own name, contact information, and change password

Admin Pages

- Admin Dashboard — Total feedback / average rating / flagged-courses counts, quick links
- Manage Courses (Listing + Add/Edit/Delete) — Core entity CRUD for courses
- All Feedback (Admin Listing) — Every feedback entry from every student, with Mark Reviewed/Resolved actions
- Flagged / Low-Rated Courses — Filtered view of courses with an average rating below a threshold
- Export Feedback (CSV/Excel) — Exports all feedback to a CSV file for record-keeping
- Bulk Upload Courses — Upload a CSV file of multiple courses; PHP reads and inserts each row

7. File Structure(Draft)

The following is the current project structure. Additional files may be added during development.

Student-Feedback-sys/

8. Tech Stack

- Front end: HTML5, CSS3, Bootstrap (assets/css/bootstrap.min.css, assets/js/bootstrap.bundle.min.js) — no Tailwind
- Client-side scripting: JavaScript
- Server-side: PHP
- Database: MySQL
